

# PRODUCT CATALOG

**The connector pipe  
that links your  
Wood Stove to an  
Insulated Chimney**

Remove the “Weak Link” in your wood heating system,  
install MODEL DSP Double Wall Stove Pipe.\*

\*See page 2 & 3 for details

# Why Choose Double Wall Stove Pipe?

Double Wall Stove Pipe was designed to work with your Stainless Steel Chimney to form a complete Wood Stove Venting system!

*Double Wall Stove Pipe is a superior product in a number of ways:*

- *Clearances are reduced to 6" from combustibles (vs. 18" for single wall pipe)*
- *It lasts significantly longer*
- *High quality, scratch resistant black finish*
- *Adjustable lengths mean no cutting pipe to fit your installation*
- *Listed, Certified, and Labeled to UL Safety Standards*
- *Lifetime Warranty on all components*

DOUBLE WALL vs SINGLE WALL STOVE PIPE				
Product	Tested & Labeled	Material	Clearances to Combustibles	Warranty
Model DSP Double Wall Stove Pipe	To ULC S641 / UL 103	Heavy Gauge Stainless Steel / Aluminized Steel	6"	Lifetime Warranty
Single Wall Stove Pipe	Not Tested or Labeled	Light Gauge Carbon Steel	18"	No Warranty*

\* If a wood burning appliance is used every day in the heating season, surveys have shown that a single wall stove pipe will need replacement every two or three years.

**Use what a Pro uses - Double Wall Stove Pipe!**

**Model DSP Double Wall Stove Pipe** is a connector pipe that links your wood stove to an insulated chimney. The connector is an important component of a wood burning system because its correct size, arrangement and installation improve the performance and safety of the heating system. Listed & Tested to ULC S641 and UL 103 Standards, **Model DSP** has an attractive outer black surface made of durable aluminized steel to withstand temperatures up to 1200°F in continuous operation.

## DOUBLE WALL DESIGN ADVANTAGES

### Better Insulating Value = Superior Stove Performance

Double Wall construction with a ¼" air space between inner and outer pipes provides a superior insulating value than single wall pipe. Better insulating value keeps flue gas temperatures higher. This helps your Wood Stove perform with an enhanced draft, which provides:

- Less chance of moisture or soot build-up within the vent
- Reduced "smoking" of the Stove at start-up
- Increase efficiency
- Less creosote build-up

### Superior Performance = Reduced Clearances (from 18" to ONLY 6")

Double Wall Stove Pipe not only keeps the flue temperatures higher, it also keeps the outer pipe temperatures cooler. This allows Double Wall Stove Pipe to be installed with only 6" of clearance to combustible materials. Single Wall Stove Pipe requires an 18" clearance, which typically means your Wood Stove sits further away from the wall and takes up valuable space within the room.

### Quality = Longer Life

The premium materials used to construct Model DSP enables the manufacturer to offer a Lifetime Warranty. Single Wall Stove Pipe is made from simple carbon steel and typically needs replacement every 2 or 3 years.

### Advanced Design = Easy Installation

Model DSP is available in a variety of lengths and elbows for ease of installation. Telescopic and Adjustable Lengths are available to eliminate cutting-to-size and allows access to the system for cleaning and inspection.

### Stainless Steel = Quality

The inner liner of Model DSP is made from corrosion resistant 400 series Stainless Steel. Together with the Stainless Steel Insulated Chimney this combination forms an all-Stainless Steel system to help your Wood Stove perform safely and efficiently. Double Wall Stove Pipe is listed to ULC S641 and UL 103 Standards - your guarantee of safety.

### Premium Paint Finish = Greater Value

The black finish of Model DSP provides a very rich and distinguished appearance. Black enamel paint is used to provide a long lasting, brighter finish that also resists scratches. The black enamel finish can also be touched up with "Thermolux 270 Low Sheen Black" or "Stove Bright 1990 Satin Black" paint in the event that the finish does get scratched.

### THE BEST WARRANTY IN THE INDUSTRY

Model DSP Double Wall Stove Pipe features an advanced engineering design and premium materials which allow us to offer a Lifetime Warranty. See written warranty for details.

# Parts and Accessories

## FIXED LENGTHS

- Available in Lengths of 6", 12", 24" and 36".
- 3 metal screws supplied with each Length.
- For Installed Length, subtract 1-3/8" per joint.

DIA.	LENGTH	DIMENSIONS				PRODUCT CODE	PART NO.
		A	B	C	D		
6"	6"	6"	6-1/2"	5-29/32"	6"	266006	DSP6P6-1

## ADJUSTABLE LENGTHS

- Includes Finishing Band.
- Adjustable from 12" to 18".
- Used to adjust pipe to desired length.
- Eliminates the need to cut pipe.
- For Installed Length, subtract 1-3/8" per joint.

DIA.	DIMENSIONS				PRODUCT CODE	PART NO.
	A	B	C	D		
6"	6"	6-1/2"	5-29/32"	6-13/32"	266086	DSP6AL-1

8"	8"	8-1/2"	7-29/32"	8-13/32"	268086	DSP8AL-1

## TELESCOPIC LENGTHS

- Includes Finishing Band.
- Adjustable from 38" to 68".
- Easily removable for inspection and cleaning.
- Eliminates the need to cut pipe.
- For Installed Length, subtract 1-3/8" per joint.

# Parts and Accessories

## STOVE ADAPTOR

- May be required to adapt some stove flue outlets to Double Wall Stove Pipe.

DIA.	DIMENSIONS					PRODUCT CODE	PART NO.
	A	B	C	D	E		
6"	6"	6-1/2"	5-29/32"	7"	5-3/4"	266243	DSP6SA-1
7"	7"	7-1/2"	6-29/32"	8"	5-3/4"	267243	DSP7SA-1
8"	8"	8-1/2"	7-29/32"	9"	5-3/4"	268243	DSP8SA-1

## UNIVERSAL CHIMNEY ADAPTOR

- Required for adapting Double Wall Stove Pipe to some insulated chimney systems.

DIA.	DIMENSIONS			PRODUCT CODE	PART NO.
	A	B	C		
6"	6-1/2"	6-1/8"	7"	266244	DSP6CA
7"	7-1/2"	7-1/8"	7"	267244	DSP7CA
8"	8-1/2"	8-1/8"	7"	268244	DSP8CA

## OVAL TO ROUND ADAPTOR

- Used to convert 8" Oval Flue outlets to 8" Round DSP.
- Crimped ends for easy connection.
- Secure with 3 screws.

DIA.	DIMENSIONS				PRODUCT CODE	PART NO.
	A	B	C	D		
8"	8-1/2"	9-1/4" x 6-1/2"	12-7/8"	13-7/8"	268250	DSP80TR

## FLUSH STOVE ADAPTOR

- Used to adapt Double Wall Stove Pipe to stoves with recessed flue outlets.
- Stainless Steel inner liner extends past stove top to make a secure connection.

DIA.	DIMENSIONS				PRODUCT CODE	PART NO.
	A	B	C	D		
6"	6-1/2"	6-1/2"	7"	5-1/2"	266249	DSP6FSA-1

8"	16-1/8"	x 16-1/8"	258463	DSP8IWT

## DAMPER KIT

- Allows the operator to alter the amount of air drawn through the venting system, controlling the stove's combustion.
- Must be installed directly on the stove's flue outlet where applicable.
- When handle is in horizontal position, the damper is "closed" (reducing combustion).
- The "closed" position is still 20% open, so the venting system is not completely blocked.
- When handle is in vertical position, the damper is wide open (no reduction of combustion).

# Model DSP Offset Chart

This chart has three columns for elbow angle required to achieve your desired offset. The first column ("Offset") represents the horizontal measurement, at the stove pipe centre line and the distance you want to offset. The second column ("height") is the height of the assembled offset elbow to the top of the return elbow. Column three shows the appropriate lengths required.

1. Determine the distance of the offset required.
2. On the chart, find the predetermined distance required for the 45 degree elbow under the corresponding chimney diameter.
3. After finding the offset, follow across the chart to find the specified height and appropriate chimney lengths required under their corresponding diameters.

OFFSET			HEIGHT			LENGTHS REQUIRED BETWEEN ELBOWS
