THE PAVER-SHIELD™ DIFFERENCE

Our patented process is not a sealant and features a smooth, ultra dense surface and rich vibrant color guaranteed not to fade!

1

Nicolock sources the highest class raw materials in the industry for the highest quality pavers

2

Our state-of-the-art manufacturing process creates a durable base mix

3

Iron oxide bonds with cement molecules resulting in the most vibrant color seen throughout each paver

4

Other quality materials are added to create our **PAVER-SHIELD™ TECHNOLOGY!**

7

PAVER-SHIELD™ is not a sealer, it's built into the manufacturing process for optimal durability

6

The final result is the very best in color, strength, and beauty that will last for generations!

5

PAVER-SHIELD™ gives pavers a tight, smooth surface texture that will not expose heavy aggregate

PAVER-SHIELD™ TECHNOLOGY

Tight, smooth surface texture that is built into the paver, not a sealer like other manufacturers

Ultra dense base mix featuring color throughout the paver ensuring a lifetime of beauty

Things to consider...

A key aspect to consider when choosing your product is your landscaping. Keep in mind the change of seasons and the way the colors around your home project will change. Different times of day may cast shadows in different areas of your pavers. It's important to plan how the environment affects your aesthetic. The color illustrations in this catalog are as accurate as photography and printing processes allow.

Final selection of colors should be made from several physical samples.

Images below were photographed minutes apart in the same location. Image on the left is with cloud cover, image on the right is in full sun.

Shade variations are inherent in colored concrete products using natural materials. Delivered product can vary slightly from physical samples.

Using advanced design fundamentals to **CREATE A STRIKING VISUAL OUTDOOR SPACE**

Nicolock has everything you need to create the **“WOW”** factor when you’re designing your outdoor space. Whether it’s a new patio, poolscape, driveway, or any other outdoor project, our design fundamentals make it easy to create a customized look that complements your particular style and taste. It all begins with color. Choose from our vast collection of rich, artisan colors. Then, get creative with our different-shaped paving stones and paver laying pattern options. Check out a few examples of popular laying patterns on the next few pages-- or mix and match to create your own unique design.

90° traditional

PAVER DIRECTION

Go from a traditional installation to an exceptional look by laying pavers at a 45° angle to create the illusion of space.

45° with border

BORDERS

Borders define edges and softly combine large areas that would otherwise be toneless. Monochromatic or contrasting colors help define your style.

45° with inlay

INLAYS

Inlays allow you to define an area within your outdoor space. Often created with contrasting colors and textures, inlays add visual interest to make your space pop.
