# WELCOME

TO NICOLOCK PAVING STONES

*Roberto Nicolio*

CEO/President, Nicolock Paving Stones

If you're like me, you take great pride in your home. It's likely your biggest investment. It's your retreat from the world and its stresses. More than just a shelter for you and your family—it's the place life's most special moments happen.

Why limit yourself—and the memories you make—to the interior of your home when you can break out and expand your living space? Imagine a dream outdoor living space custom-designed with every feature that's important to you and your family. From patios to poolscapes, fire pits to outdoor kitchens, lighting and sound features, and everything in-between, we've got you covered.

It's time to give your backyard what it wants!

Whether you're here to start planning the perfect outdoor living project or are a returning customer looking to add some of the newest design features to your existing Nicolock oasis, we're happy to help you.

With an outdoor living space by Nicolock, you're not just investing in the long-term value of your home, you're living life better today. You're building a space where everyone special to you will want to gather together—year-round—to create priceless memories.

Together, we'll transform your backyard into a place you won't want to leave—and the place you can't wait to return to if you do.

Three generations of my family have been building homeowners' hardscape dreams for over 60 years.

Let's build yours next.

## WHY HOMEOWNERS CHOOSE NICOLOCK

**Color That Can't Be Beat.** Did someone say "COLOR"? Nicolock customers surveyed consistently state that, of all the reasons to choose our products, the single most important factor in their buying decision was COLOR. And none of our competitors can beat the vast range of stunning color palettes Nicolock offers.

With virtually limitless, vibrant color options, we can accommodate whatever your vision entails—from earthy tones to accent features that pop with color, and more, Nicolock has you covered on color.

And thanks to our exclusive, patented paver-shield™ technology, you can count on our pavers to always look as good as the day we installed them. Infused from top to bottom, each stone has color that lasts—and durability to match.

**Personalized Shopping Experience Options.** Whether you already know exactly what your dream yard will look like, or you have some ideas in mind to get started, or you're totally lost over the many choices we offer, our team is here to help you every step of the way.

It's important to us to make the process, stress-free and enjoyable for you from our very first meeting until the last paver of your project is placed. We offer shopping experiences to suit your preferences.

If you are looking for inspiration for your next outdoor living project, you are welcome to visit one of our spacious outdoor design centers. Here, you can explore the many samples of outdoor living features and projects on display. This is a great starting point for many of our customers.

Maybe you prefer a personalized and pampered shopping experience? Let us bring our showroom to your front door. Imagine your excitement—not to mention your neighbors' attention—when our 10 x 20-foot luxury mobile showroom pulls up to your home with samples of many of our most popular foundational pieces and accent features. You can see it all up close, in person, at your home. Feel the pavers, see the colors, check out the popular fire features while being guided by one of our friendly, knowledgeable territory managers. Our projects sell themselves, so you will never be pressured by our sales team.

**Guaranteed for Life...and Longer: Our Lifetime Transferrable Warranty.** It is our mission to deliver the outdoor living space you dreamed of. And when we say we stand behind our work, it isn't just empty words.

Three generations of my family (so far!) have backed our promise with something as strong as the Nicolock family reputation. It's our **lifetime, transferable warranty.**

It's us promising that the project we build for you today will be enjoyed not only for as long as you own your home—but for as long as the person you someday transfer it to owns it as well. What a value to pass on to a future buyer of your home! You'd be hard-pressed to find a guaranty like ours on any other indoor or outdoor home improvement project.

**"Show Me the Money!"—Affordability and Financing.** Whatever you dream for your project, we are committed to finding the payment solution that works best for you regardless of the size of your budget. In fact, we offer multiple financing options that help homeowners complete their projects all at once, as well as options for those who want or need to spread their projects out in phases over time.

If you comparison shop, you will find that our products are often significantly more affordable than our competitors' similar products.

We love when our customers return to expand on their original projects by adding other exciting features like pizza ovens, outdoor kitchens, fire features, and more. We're seeing this upgrading trend every year as we roll out new and irresistible, "must-have" features to take the fun up another level! And this year is no exception!

Nicolock offers stunning lighting, sound, and design options that rival professional catering venues. So, many of our customers wisely choose to invest in a permanent backyard paradise instead of spending that money on a single, four-hour catering hall event. Can you picture special events in the outdoor space you're dreaming of creating?

Just like indoor home improvements are often financed, your outdoor investment can be as well. Let's talk.

**We've Got the Goods—No Supply Chain Worries.** Just as important as doing the job right, is doing the job on time. We respect your time and pride ourselves on showing up with our products to do the job when we say we will be there.

We don't have supply chain worries because we make our paving stones on Long Island and in three more of our manufacturing plants throughout the northeast. So, wherever you are, you're never far from a Nicolock facility.

Unlike some of our competitors, we have plenty of inventory and won't try to limit you to just a handful of the most popular options. You can have it all. Your color. Your style. Don't you and your family deserve that?

So, are you ready to give your backyard what it wants?

Because we're ready when you are.

# COME HOME TO NICOLOCK!

Nicolock pavers have a full, structural lifetime warranty\* and are transferable to the next owner should you sell. Register your products at [NICOLOCK.COM](https://www.nicolock.com) and follow the 3 easy steps below.

# 1

Click the **WARRANTY** link at the bottom of our homepage.

# 2

Fill out the requested information

# 3

Upload Proof of Purchase

## LIFETIME WARRANTY\*

Nicolock provides a limited lifetime warranty on the structural integrity of its manufactured product used in residential applications. Nicolock pavers are warrantied for as long as you own your home and are transferable to the next owner should you sell. Nicolock products installed in accordance with our guidelines and industry standards that are deemed to be structurally defective will be replaced with products of equal value. Removal and replacement labor cost is not the responsibility of Nicolock. Regarding de-icing products, Nicolock recommends sand for slip resistance as it is the most environmentally friendly option for use on concrete products. If a de-icing product is used, Nicolock recommends using only NaCl (rock salt) which should be used sparingly, following the manufacturer's instructions. Once ice is loosened, remove immediately to avoid buildup of the de-icing agent. **NOTE:** De-icing agents of any kind are not recommended for our Nicostone line.

Color matching and product availability are not guaranteed. Proof of purchase and/or installation contract must be made available prior to or at the time of inspection by an authorized Nicolock representative. Other exclusions apply.

Nicolock / Nicolica Concrete Products is the owner or authorized user of all patents and trademarks for products and designs illustrated herein. Firma®, Checker Block®, Sante-Euro® & paver-shield® are examples of registered trademarks of Nicolica Concrete Products. SF-Rima® is a trademark of SF Concrete Technology, Inc. Trinity® is a trademark of Earth Reinforcement Technologies. • US Patent #: Firma® 6,082,933.

# DEFER PAYMENT, NOT YOUR DREAMS!

Introducing **Nicolock Financing** powered by Service Finance, a nationwide consumer finance program. Our exclusive financing plans make it possible for homeowners to complete their dream outdoor living spaces now with the help of multiple financing options, including true no interest payment (SAC), low monthly payments, or a combination of both plans.

Increase your home's value with the peace of mind of **Nicolock Financing**. Ask your Territory Manager for more information.

### LOW MONTHLY PAYMENTS

Avoid high credit card interest rates. Choose the best payment option for you.

### UNSECURED FINANCING

100% unsecured financing up to **\$100,000** on approved credit.

### FAST, EASY AND SAFE

Easy application for near-instant approvals via phone, online or mobile app, 24/7

### PEACE OF MIND

The application is free, there are no closing costs and no prepayment penalties

**OCEANIC BLUE**

Stone Ridge Contemporary

**THE  
 PAVER-SHIELD<sup>™</sup>  
 DIFFERENCE**

Our patented process is not a sealant and features a smooth, ultra dense surface and rich vibrant color guaranteed not to fade!

1

Nicolock sources the highest class raw materials in the industry for the highest quality pavers

2

Our state-of-the-art manufacturing process creates a durable base mix

3

Iron oxide bonds with cement molecules resulting in the most vibrant color seen throughout each paver

4

Other quality materials are added to create our **PAVER-SHIELD<sup>™</sup> TECHNOLOGY!**

Ultra dense base mix featuring color throughout the paver ensuring a lifetime of beauty

7

**PAVER-SHIELD<sup>™</sup>** is not a sealer, it's built into the manufacturing process for optimal durability

6

The final result is the very best in color, strength, and beauty that will last for generations!

5

**PAVER-SHIELD<sup>™</sup>** gives pavers a tight, smooth surface texture that will not expose heavy aggregate

**PAVER-SHIELD<sup>™</sup> TECHNOLOGY**

Tight, smooth surface texture that is built into the paver, not a sealer like other manufacturers

# BEFORE YOU START...

A key aspect to consider when choosing your product is your landscaping. Keep in mind the change of seasons and the way the colors around your home project will change. Different times of day may cast shadows in different areas of your pavers. It's important to plan how the environment affects your aesthetic. The color illustrations in this catalog are as accurate as photography and printing processes allow. **Final selection of colors should be made from several physical samples.**

Images below were photographed minutes apart in the same location. Image on the left is with cloud cover, image on the right is in full sun.

Shade variations are inherent in colored concrete products using natural materials. Delivered product can vary slightly from physical samples.

# Using advanced design fundamentals to **CREATE A STRIKING VISUAL OUTDOOR SPACE**

Nicolock has everything you need to create the “**WOW**” factor when you’re designing your outdoor space. Whether it’s a new patio, poolscape, driveway, or any other outdoor project, our design fundamentals make it easy to create a customized look that complements your particular style and taste. It all begins with color. Choose from our vast collection of rich, artisan colors. Then, get creative with our different-shaped paving stones and paver laying pattern options. Check out a few examples of popular laying patterns on the next few pages-- or mix and match to create your own unique design.

**90°** traditional

## **PAVER DIRECTION**

Go from a traditional installation to an exceptional look by laying pavers at a 45 degree angle to create the illusion of space.

**45°** with border

## **BORDERS**

Borders define edges and softly combine large areas that would otherwise be toneless. Monochromatic or contrasting colors help define your style.

**45°** with inlay

## **INLAYS**

Inlays allow you to define an area within your outdoor space. Often created with contrasting colors and textures, inlays add visual interest to make your space pop.

# step 1, choose your **COLOR**

**Nicolock's rich, artisan colors—in blends of tans, browns, grays, and blues—are where your outdoor living dreams begin. Create your perfect space from our virtually limitless palettes of warm and cool neutral tones.**

**Overwhelmed by color options? Consider building a hardscape that complements your home's exterior design elements. Draw color inspiration from your siding, shutters, roof, and fence!**

# MRP SUPPORTS

Decking and paver pedestal systems make a great alternative to traditional paving projects. These systems provide support for removable floor paneling, are quick and easy to install, improve ventilation to prevent water and mold damage, and can reduce energy consumption. Adjustable, self-leveling supports are slip resistant and can be used to compensate for slopes and absorb noise. Additional units available other than shown below. Project take-offs available upon request.

### ADVANTAGES OF PEDESTAL SUPPORTS:

- Hides pipes and equipment while providing easy access for maintenance
- Absorbs expansion and structural movement
- Eliminates requirements of surface preparation
- Compensates for uneven and irregularities in the surface to create a flat surface
- Facilitates fast water drainage to resist mold
- Provides better thermal insulation
- Ensures fast installation to save money

**PRIME-PR1**  
covers heights:

**SE5-P**  
covers heights:  
6.75"-8.5"

The adjustment key allows you to level your final grade by adjusting the height of the pedestal WITHOUT removing the paver. This unique tool helps save on labor costs, assists in reducing the opportunity for injuries caused by repeatedly removing heavy pavers in order to shim to achieve a level surface.

\*Wall heights shown are intended as a guide and not for construction purposes. **Note:** Gravity walls rely on unit weight and unit set-back to retain soils. Reinforced walls rely on unit weight, unit set-back and geogrid to retain and stabilize soils.

The symbol signifies that this product is suitable for building elevated wall heights using geogrid reinforcement or other design methods. Consult a licensed engineer for design assistance.

BLUESTONE

BLUESTONE

### Ledgestone Block Specifications

- Trapezoidal shape allows convex and concave radii
- 5.5 inch deep texture
- Rich formulated colors to mimic the look of natural stone
- Ten individual face molds offer up to 115 square feet of non-repeating patterns
- Wet-cast concrete gives a greater level of detail and durability

## REDI-ROCK®

**REDI-ROCK**

Gravity, reinforced, hybrid, and freestanding walls come together to create optimized solutions. Redi-Rock® Ledgestone blocks, available in four natural colors, give projects a random, stacked stone look. Because they're made using architectural-grade precast concrete, the depth and level of detail in the texture is outstanding.

### GRAVITY RETAINING WALLS

- Build walls over 20 feet tall
- Reduce excavation and use a smaller footprint without geogrid
- Install quickly with a machine and small crew

### REINFORCED RETAINING WALLS

- Build walls over 50 feet tall
- Eliminate geogrid connection failures with positive connection blocks
- Support heavy live loads

### HYBRID WALLS

- Blend gravity and reinforced sections
- Combine precast modular blocks with cast-in-place
- Maintain seamless appearance

### FREESTANDING WALLS

- Integrate parapets with other walls seamlessly
- Build stand-alone structures
- Create great looking results with texture on multiple sides

RUSTIC BROWN

# Turn up the heat with our **FIRE PITS & FIREPLACES**

## **WOOD**

If you prefer the smell and crackle of logs burning in the style of an old-fashioned campfire, the nostalgic charm of the Standard Wood option is for you.

## **SMOKE-LESS WOOD**

For a wood-burning experience with less smoke, choose a double wall system with a smoke-less insert. Rising hot air exits the wall cavity through tiny holes in the top of the insert which reduces smoke.

## **GAS**

If you prefer the experience of a gas-burning fire, we offer the flexibility of choosing propane or natural gas. Further customize your fire vision with multiple ignition-type options. Packages include vent kits and control panels.

**GRANITE CITY BLEND**

## COWBOY CAULDRON

Say “Howdy!” to the Cowboy Cauldron –the world’s finest fire pit and grill.™ And possibly the coolest thing you ever did see. Channel your inner wrangler and treat your family and friends to endless entertainment and moments of meaningful interaction with one of these beautiful, versatile, and durable cauldrons. Each Cowboy Cauldron is painstakingly built by hand from solid plate steel and functions as a combination of fire pit, grill, and cooking vessel. It’s built to outlive you and last for generations to come. Whatever your lifestyle, there is a cauldron that fits it. You can take it to campgrounds, beaches, lakeshores, ski hills, tailgate parties, in the RV, and to other places where adventure awaits. Or settle it into your backyard and let the fun begin as your favorite people gather ‘round it. Be forewarned...you’re gonna need more chairs! Happy trails...

### The Dude®

This smaller cauldron is huge on adventure. It is lightweight, convenient, mobile, and affordable with segmented legs for easier transport. Its 24", 35 lb. basin brings the heat and draws the crowds wherever it goes – camping, tailgate parties, ski hills, the beach, or on your patio. Scaled to fit almost any lifestyle. You'll wonder how you ever lived without it.

#### FEATURES:

- Solid Steel Construction
- Segmented, 2-Piece Legs
- Use as Fire Pit, Grill, or Cooking Vessel

#### INCLUDED:

- Cauldron Basin
- Tripod Frame
- Suspension Chain
- Charcoal Grate
- Cooking Grill
- Rain Cover

24 IN. DIAMETER / 35 LB. BASIN

### The Urban Cowboy

The most versatile cauldron. Its 30" basin provides your crew with plenty of warmth to extend your outdoor life by weeks in the fall and spring. More than a cozy heat source, this cauldron really shines as a grill and cook pot--adding a western flair, a haunting vibe, or a touch of sophistication to any gathering at home or on the road. Though slightly larger, one person can still easily transport it, so you don't have to leave home without it.

#### FEATURES:

- Solid Steel Construction
- Perfectly Proportioned
- Multipurpose Fire Pit, Grill, Cooking Vessel

#### INCLUDED:

- Cauldron Basin
- Tripod Frame
- Suspension Chain
- Charcoal Grate
- Cooking Grill
- Rain Cover

30 IN. DIAMETER / 75 LB. BASIN

### ALSO AVAILABLE:

#### The Wrangler

36 IN. DIAMETER / 130 LB. BASIN

#### The Ranch Boss

# ESSENZE DI LUCE

Take your outdoor living space to the next level with stunning, multi-sized natural stone monoliths and LED lighting available with or without a high-fidelity sound diffusion system. From romantic moments to big bashes, Essenze di Luce has you covered with a variety of natural stone lighting and rock speaker options that are maintenance-free and designed to withstand the most adverse weather conditions-- from ice to the desert sun. Perfect for gardens, poolscapes, and outdoor living use.

## Menhir Di Luce

A series of natural stone outdoor lamps and garden lights with LED technology, available in four different styles—Soft, Sidelong, Cross, and Stonehenge. In daylight, they function as design elements but evoke emotional light in the evening.

### FEATURES:

- Choose from single, double, or triple illuminated sections
- Choose from horizontal or inclined patterns
- Available in 2 standard textures
- Minimalistic and natural design complements any architectural style
- Ice resistant
- Stainless Steel

SOFT

SIDELONG

CROSS

STONEHENGE

## Menhir Sound

This natural stone outdoor sound system integrating Hi-fi sound diffusion and LED lighting brings both sights and sounds to the yard. Fill your space with soft illumination and your favorite music—all effortlessly emanating from natural stone elements. Unparalleled resistance to splashes, spray, sand, and the most adverse weather conditions.

### FEATURES:

- Aisi 316L stainless steel audio system
- Easy connect; user-friendly; control music from your device
- Plays/streams the most popular music services
- Choose from 3 standard textures
- Ice resistant
- Wi-fi Audio Controller

MINIMAL SOUND  
(SPECIAL ORDER)

SOUND PRO  
(SPECIAL ORDER)

## Stake

Arrange an ambience with outdoor path lighting. Sleek pillars of natural stone offer architectural and design elements by day and transform into striking and luminous scenic features by evening. Perfect for illuminating footpaths, flower beds and outdoor living areas.

### FEATURES:

- Natural stone floor lamp for outdoors
- Choose single or double vertical LED (only 4mm thick)
- Ice resistant
- Multiple color and texture options
- Fits modern, contemporary, and Mediterranean styles
- Chemical Resistant
- Stainless Steel

# PAVING STONE INSTALLATION

## MATERIALS NEEDED

- Gloves
- Tape Measure
- Stakes
- Shovel
- 3 lb. Hammer
- Levels
- Line Level
- Carpenters Square
- String Line
- Broom
- Wheelbarrow
- Pry Bar
- Wire Cutters
- Mason's Chisel
- Markers
- Screed Board
- Two 1" o.d. Screed Pipes
- Plate Compactor
- Paver Cutter
- Diamond Blade Table Saw

- A. Compacted Sub-Base
- B. 4" - 6" Compacted Aggregate  
(for Pedestrian Traffic)
- C. 8" - 12" Compacted Aggregate  
(for Vehicular Traffic)
- D. Edge Restraints
- E. 1" Bedding Sand
- F. Pavers

## BEFORE YOU BEGIN

Your dealer can assist you in obtaining the necessary materials and equipment needed to complete your paving stone installation.

\*Three color blends are not recommended for projects less than 500 sq.ft

Lay out your entire paver pattern prior to cutting any stones.

Find an area away from your installation to cut pavers. Concrete dust created by saw cutting pavers can stain the surface.

The use of an approved safety mask is recommended when cutting any concrete products.

## 1. PLAN

Determine the area to be paved. Measure for square footage and sketch a diagram of the shape & pattern of paving stone desired.

## 2. PREPARE / EXCAVATE

Before beginning excavation, make sure there are no utility lines within the area to be paved. Excavate area to the proper depth depending on the type of traffic.

### 3. GRADE

Establish the finish grade and slope or pitch of pavement to allow for drainage. Lay out the lines and corners with string line and stakes. Compact sub-base.

### 4. PREPARE / EXCAVATE

Spread aggregate base uniformly throughout the entire excavated area and 8 in. beyond perimeter lines. Base aggregate material should be processed 3/4" minus gravel or crushed concrete blend.

### 5. BASE COMPACTION

Compact the base aggregate evenly throughout the area with a mechanical plate compactor. Do not compact the base aggregate in more than 4" layers. The compacted base should conform to the contour of the finished paved area. The grade of the base aggregate should be 3" to 4" below the finished paving stone surface depending on the thickness of the paver.

### 6. EDGE RESTRAINTS

Install edge restraints as required. Pavers butting against curbs or

foundations will not need an edge restraint. Various types of edging materials can be used. Nicolock recommends a Snap Edge edge restraint system since it is easy to install and will not rot or decay.

### 7. BEDDING

Spread 1" of concrete sand evenly over the compacted base. Screed the bedding sand to a level, smooth surface using a screed board. For areas wider than the width of the screed board, use 1" conduit pipe as screed guides 4' apart. Screed sand, remove screed rails & fill in depressions with fresh sand. You should end up with a complete layer of smooth sand. Do not disturb sand bed after it has been screeded.

### 8. PAVER PLACEMENT

Begin placing paving stones on the screeded sand bed in the desired pattern. Hand place the paving stones with a hand tight joint. Work from the paving stone side of the installation as they are set. To achieve the best mixture of colors and blends, remove pavers from delivered bundles section by section, not layer by layer, and work from several bundles at a time. Cut pieces as needed to fill in the pattern.

### FINISHING

When complete, sweep surface clean. Spread a fine jointing sand over the entire surface and broom sweep to fill all joints. Leaving excess sand on the paving stone surface, tap the paving stones into the setting bed with the mechanical plate compactor with a rubber pad. Broom sweep more sand to fill any open joints. Finally, backfill over the top edge restraint and grade. Your installation is now complete and ready for use.

# RETAINING WALL INSTALLATION

## MATERIALS NEEDED

- Gloves
- Tape Measure
- Stakes
- Shovel
- 3 lb. Hammer
- Levels
- Line Level
- Carpenters Square
- String Line
- Broom
- Wheelbarrow
- Pry Bar
- Wire Cutters
- Mason's Chisel
- Markers
- Screed Board
- Two 1" o.d. Screed Pipes
- Plate Compactor
- Paver Cutter
- Diamond Blade Table Saw

**NOTE:** The following Installing procedures apply to all Nicolock retaining wall units constructed as a conventional gravity wall system.

**PREPARING/EXCAVATING:** Before beginning excavation, make sure there are no utility lines in the wall area. Excavate area to the proper depth. For geogrid-reinforced retaining walls or for more detailed information, consult your local distributor or contact Nicolock.

For most non-critical walls (and under favorable soil conditions) Nicolock wall units are constructed as a conventional gravity wall system. Walls up to 3 feet in height are attainable without the need for soil reinforcement (geogrid). Recommended installation procedures should be followed to ensure the life of your wall structure.

## 1. SITE PREPARATION AND EXCAVATION

Excavate a trench a minimum of 6" beyond the front and back of the wall block. Dig trench 9" to 14" deep, enough to create a 6" thick leveling pad and to bury at least one whole wall block below grade. Compact the soil at the bottom of trench. Shape the slope behind wall to allow for 12" of drainage material.

## 2. INSTALL LEVELING PAD

Place filter fabric in trench and up the cut slope. Fill trench with clean, graded aggregate and compact.

## 3. PLACE BASE COURSE (FIRST ROW)

Position a level string line at the straight face of the unit to maintain alignment. Place the wall units side by side in the center of the prepared base. Bury the first course of block below grade to a depth equal to 10% of the height of the wall or a minimum of 6", whichever is greater. Level units from side to side, and front to back.

## 4. DRAINAGE SET-UP

Fill the space in front of wall with clean fill to grade to hold units from shifting. Place a perforated pipe behind wall on top of base for drainage. Fill any block cores and the drainage area with clean aggregate keeping filter fabric in place. Backfill soil on outer side of fabric and compact.

## 5. STACKING UNITS

Place successive courses by fitting the keys and grooves onto the units in the row below (if applicable). Keep the tops of each course clean to maintain a level surface. Stack units one layer at a time in a running bond pattern (crossing joints). Utilize geogrid when the wall height is 3 ft or more or as required by the project engineer or approved design drawings.

## 6. PLACE GRAVEL AND BACKFILL MATERIALS

Continue building the wall to the desired height. Backfill with clean aggregate behind each course as completed. Backfill and compact soil. Finish the wall by securing the wall cap with a suitable masonry adhesive.

\*Geotextile may be necessary when the infill soil includes fine-grained sand that have the potential to infiltrate the gravel fill

**Note:** Illustrations shown are not for construction purpose. Please confer with your local engineer for proper placement of geogrid.

**Important:** Walls higher than 36" above grade, terraced walls, weak soils, and other loading conditions require special considerations in design and construction. This should be done by a qualified engineer & a professional contractor. Check with your local building department for code requirements.

# STAIN REMOVAL

The stain removal methods suggested here are merely a guide and may not work to your satisfaction in all instances. Nicolock is not responsible for any damage caused while using these methods. Nicolock recommends that you keep several pavers from your initial installation available to replace any pavers that become damaged or excessively stained or soiled.

## ALGAE & FUNGAL GROWTHS

Apply a fungicide according to manufacturer recommendation.

## BEVERAGE STAINS

Scrub the stain with hot soapy water. For stubborn stains apply a 1:10 diluted sodium hypochlorite solution (household bleach) use according to the manufacturer's recommendations.

## CHEWING GUM

Chewing gum is best removed with a suitable aerosol freezing agent before scraping it off. Use according to the manufacturer's recommendations.

## FRESH OIL STAINS

Soak the oil up with an absorbent cloth or paper towels. Do not wipe. Then cover the affected area with a 'dry' absorbent powder and leave for 24 hours. Repeat until the powder has absorbed all or as much of the oil as possible.

If a stain persists, apply a recommended cleaner according to the manufacturer's recommendations.

## PAINT /WOOD-STAIN /VARNISH

Soak up the spillage with an absorbent cloth or paper towels. Do not wipe. The stained area should be immediately scrubbed with scouring powder and water.

The stained area should be immediately scrubbed with detergent and water. Paint removers or solvents should not be used on stains that are less than a week old, as this will increase penetration into the concrete. Scrape off as far as possible. Apply an appropriate proprietary paint remover, preferably one supplied as a thick gel. Follow the manufacturer's recommendations or contact the paint manufacturer.

## WOOD PRESERVATIVES /CREOSOTE

Soak the stain with mineral spirits and scrub with a hot detergent and water. Finally rinse thoroughly with clean water, or contact the manufacturer of the preserver.

## ASPHALT & EMULSIFIED ASPHALT

Chill with ice (if warm outside), scrape away & scrub the surface with scouring or abrasive powder. Rinse with water.

## CUTBACK ASPHALT & ROOFING TAR

Use a soft moist putty made with talc or diatomaceous earth (available wherever pools supplies are sold.) Mix with kerosene, scrub, let dry and brush off. Repeat as needed.

## CANDY, KETCHUP, MUSTARD, GREASE DRIPPINGS FROM FOOD

For stubborn stains, apply liquid detergent full strength and allow it to penetrate for 20-30 minutes. Scrub and rinse with hot water. Removal is easier if these stains are treated immediately.

## CAULKING

Scrape off excess and scrub with denatured alcohol. Rinse with hot water and detergent. For acrylic latex caulk - follow guidelines for removal of latex paint.

## CLAY SOIL

Scrape off dry material, scrub and rinse with hot water and strong detergent.

## CREOSOTE

Apply a solution made with paint thinner and talc. Scrub and allow to dry. Scrape off, scrub with scouring powder and rinse with water.

## MORTAR

Let dry but not harden and carefully remove spots with a towel, putty knife or chisel.

## LEAF, WOOD ROT OR TOBACCO STAINS

Apply household bleach diluted 10:1 with water (10 parts water) and scrub with a non-metallic stiff bristled brush.

## OIL OR GREASE THAT HAS PENETRATED

Mop up any excess oil with rags. Cover the area with oil absorbent talc, (kitty litter). Diatomaceous earth can also be used. Leave it on the stain for a day, then sweep up.

## PAINT

Fresh paint should be mopped up immediately with rags or paper towels by blotting. Do not wipe as this will spread the paint and extend the job of removal. If the paint is latex and water-based, soak and then scrub area with hot water, scouring powder and a non-metallic stiff brush until no more improvement is seen. Let the remaining paint dry and remove as described below.

## DRIED PAINT

Scrape any excess oil-based paint, varnish or water-based latex paint off the surface. Apply a commercial paint remover and let sit for 20-30 minutes. Loosen with gentle scrubbing. Do not rub the loosened paint into the surface of the pavers. Instead, blot up the loosened paint and thinner. Repeat as necessary.

## TIRE SKID MARKS

Scrub black area with water, detergent and scouring powder.

## ABOUT EFFLORESCENCE:

Efflorescence is a whitish, powder-like deposit that may sometimes appear on the surface of the paving stones. It may appear immediately or within a short time after installation. Left alone, normal wear and exposure to the elements will dissipate the efflorescence. Efflorescence does not affect the structural performance or durability of concrete pavers. Efflorescence is a normal occurrence in all cement based products, as well as many colored paving products. Because it is a natural reaction to

the proper hydration of concrete, Nicolock accepts no responsibility or liability for replacement.

If there is a need to remove the efflorescence before it naturally wears away, best results are obtained by using an efflorescence remover which is available from most mason supply dealers. Do not use muriatic acid.

If a sealer is to be applied to the paving stones, it is recommended that any presence of efflorescence be removed prior to sealer being applied. For installations over a new or existing concrete base, a cementitious setting bed, or with mortared joints, the occurrence of efflorescence is more likely. Precautions for proper drainage of the paving stones system should be taken to minimize this occurrence.

## WHAT IS EFFLORESCENCE?

Efflorescence is a natural phenomenon and can occur with any cement based product, as well as other paving products. It may appear randomly and will possibly appear more pronounced on colored paving slab.

The white bloom may give the impression that the color of the paving slab is fading but, when wet, you will find that the efflorescence vanishes and the paving slab returns to its original shade. The white bloom will often return again when the paving slab dries. Be assured that efflorescence has no detrimental effect on the performance of the paving slab and will generally disappear with time.

## HOW DOES EFFLORESCENCE OCCUR?

All concrete products contain cement which produces water soluble calcium oxide (lime).

Concrete paving materials contain millions of tiny invisible pores; when moisture penetrates into these pores – either from rain, dew or condensation – it dissolves part of the lime to make calcium hydroxide.

When the slab dries out, the calcium hydroxide rises to the surface and reacts with the carbon dioxide in the air, sometimes leaving a white bloom of calcium carbonate once the water has evaporated.

## WILL EFFLORESCENCE DISAPPEAR NATURALLY?

Yes. The efflorescence action is arrested by carbon dioxide reacting with calcium oxide within the pores of the concrete. The efflorescence itself is then, over a period of time, either converted back to soluble salts and washed away by rain or simply disappears through the action of trafficking, snow or ice.

Once the efflorescence has disappeared naturally it does not usually recur. It is therefore not necessary to replace the paving or to take other measures against efflorescence.

## HOW LONG WILL EFFLORESCENCE LAST?

This is difficult to predict as factors such as climate, location and conditions (damp/shady or open/sunny) are variables which can affect the extent of the phenomenon. However, on average, it can take from 12 months to 24 months to disappear.

# FAQ

## WHY DO NICOLOCK PAVERS MAKE THE BEST PAVEMENT?

Not only are Nicolock pavers beautiful, but they provide the best pavement solution in freeze/thaw conditions, when installed over a compacted aggregate base. Installation over a compacted aggregate base results in a pavement that is strong, yet flexible enough to move as the ground shifts without breaking apart, rutting or heaving. In addition, they can be "unzipped" to allow for repairs or access to utility lines. Unlike asphalt and other surfaces, pavers are virtually maintenance-free. And, by definition, concrete pavers are about 3 times stronger than regular poured concrete.

## WHAT MAKES PAVER-SHIELD™ BETTER THAN THE COMPETITION?

paver-**shield**™ is not a thin veneer of color coating. paver-**shield**™ pavers are guaranteed to look great year after year, retaining their vibrant color and smooth texture. Products without paver-**shield**™ may look worn and faded over time with exposed aggregate on the surface.

## DOES THE COLOR GO ALL THE WAY THROUGH NICOLOCK PAVERS?

All Nicolock pavers have color throughout. Those manufactured with our exclusive paver-**shield**™ process have an extra concentration of cement and pigment on the wear layer providing deep rich colors and a smooth, dense wear layer.

## CAN I USE A PRESSURE WASHER TO CLEAN MY PATIO?

Yes – but, as always, follow the manufacturer's instructions carefully. Do not pressure wash your patio too strongly or too frequently as you may damage the surface of the paver.

## CAN PAVERS BE INSTALLED OVER A POURED CONCRETE BASE?

Absolutely, provided certain steps are taken. Care must be taken so that water does not pool underneath the pavers. Drainage holes should be drilled in large slabs and filled with pea gravel and covered with landscape fabric. Edge pavers must be restrained to keep joints from opening up.

## CAN I USE A SEALER ON MY PATIO?

Yes – check proprietary manufacturer's instructions and suitability for sealing concrete paver. Please note: applying sealant to paver may affect the color.

## HOW DO PAVERS COMPARE WITH PATTERNED CONCRETE?

Patterned concrete pavements are slabs of concrete that are embossed with a pattern. Therefore, they are prone to the same problems with freeze/thaw cycles, namely cracking and spalling. Also, unlike Nicolock pavers, patterned concrete pavements don't allow access to underground utilities or the ability to make repairs. At virtually the same price installed per square foot, Nicolock Pavers are clearly a superior choice.

## HOW DO I DETERMINE HOW MUCH STONE BASE MATERIAL AND SAND SETTING BED MATERIAL I NEED?

One half ton of modified stone or sand will cover about 100 square feet at 1" thick. Using a 10' x 10' (100 square feet) patio as an example, you would need 1/2 ton of sand for the setting bed (1" thick) and 3 tons of modified stone for the base (6" thick). You'll need about 5% more sand for the joints between the pavers. The thickness of the base material depends on the application and subgrade soil conditions (use a thicker base for poorly drained soils). As a rule of thumb, you'll need 4" to 8" of base material for walkways and patios, and 8" to 12" for driveways and parking lots.

## I HAVE WHITE DEPOSITS ON MY PAVERS/WALLS, WHAT IS IT?

You are probably referring to efflorescence, a natural and common occurrence in many concrete products. Efflorescence occurs when natural salts come to the surface and leave behind a white deposit that can normally be brushed off. This is not a product defect or harmful to pavers and walls and Nicolock accepts no liability for its occurrence. It will usually weather away with time.

## HOW CAN I REMOVE MOSS OR MOLD FROM MY PAVERS?

Try liquid bleach diluted in water (10 parts water to one part bleach). Be careful not to get it on plant material. Keep in mind that there is nothing that will keep moss and mold from reappearing in a shady, damp area.

## WHAT IS POLYMERIC SAND AND WHAT IS ITS ADVANTAGE?

Polymeric sand is a high-tech mix of graded sand and binder, specially formulated for filling joints between pavers. When installed properly, polymeric sand will remain in the paver joints and inhibit weed growth and insect infestation.

## CAN I USE NICOSTONE PAVING INSIDE MY HOUSE?

Yes – but it is preferable to seal the paving with a sealer after laying inside to protect against stains and reduce incidence of dust.

## WHY DO THE PAVING STONES HAVE DARK PATCHES?

This is due to differential weathering, where the surface of the paving has cured at different rates, causing darker color variation on the paving. Generally this is exaggerated by the presence of efflorescence which, once removed, will reduce the effect of the dark patches. As with efflorescence the dark patches will generally disappear with time.

## HOW OFTEN SHOULD I CLEAN MY PATIO?

Regular washing and brushing should be adequate to maintain your patio in pristine condition. However, you may wish to clean your patio using a recommended cleaner. This can enhance its appearance but it may affect long term durability and should only be used sparingly (only two or three times during the

lifetime of the paving). Consult your paving supplier for advice and a suitable cleaning product.

## WHAT ARE THE BENEFITS OF SEALING MY PAVERS? HOW LONG DO I NEED TO WAIT BEFORE I APPLY A SEALER?

Sealers help resist stain and may enhance the color. Some can also bind the sand in the joints to make it difficult for weeds to germinate. As a rule of thumb we generally want you to wait at least six months to allow any efflorescence to appear. Prior to the application of any sealers, the pavers must be cleaned with an appropriate product to remove dirt and efflorescence.

## CAN NICOLOCK PAVERS BE USED FOR MY DRIVEWAY?

Absolutely! For residential driveways, 8" to 12" of compacted base material is recommended. A standard 2-3/8" thick paver can be used for light vehicular (cars & pickup trucks) applications. A herringbone pattern is most suitable in these situations. (Not applicable for Stone Ridge XL, Alpine series and Nicostone products.)

# FAQ

Not only do Nicolock Pavers make an attractive pool deck, but they also provide a slip-resistant walking surface. Pavers actually are better than poured concrete around pools from the standpoint that the joints will take on moisture and leave the pavement cooler under foot. Like all products that are used outdoors, lighter colors will tend to stay cooler as they reflect the sunlight. Furthermore, our Fullnose and Pool Coping Pavers are ideal for the pool's edge. Make sure the base material around the pool is well compacted before installing pavers. Safety covers can also be installed over pavers with the use of special anchors.

## WILL WEEDS GROW BETWEEN MY PAVERS?

Weeds and grass between pavers occur when seeds or spores lodge in the joints between pavers. They will not grow from underneath. This can be minimized by using polymeric sand or mixing a pre-emergent granular weed killer into the joint sand. If weeds do appear, a spot vegetation killer (such as Round-Up™) can be used and will not damage the pavers.

## CAN I SHOVEL AND PLOW MY PAVERS?

Pavers can be plowed and shoveled just like asphalt, concrete and other pavement materials. In fact, snow and ice will normally melt faster because of the joints around the pavers. A plow blade with a rubber edge is recommended when needed. Do not use sharp objects to chop ice as they can damage the pavers.

## WHAT SHOULD I USE TO MELT SNOW AND ICE ON MY PAVERS?

Nicolock recommends sand for slip resistance as it is the most environmentally friendly product for use on concrete products to make sure surfaces are skid and slip resistant.

If a de-icing product is used, Nicolock recommends using only NaCl (rock salt) and should be used sparingly, following the manufacturer's instructions. Once ice is loosened, remove immediately to avoid buildup of the de-icing agent.

De-icing agents of any kind are not recommended for our Nicostone line. We recommend using only sand for providing skid and slip resistance.

## I'VE GOT A RAILROAD TIE WALL THAT IS ROTTING AND FALLING DOWN. WHAT CAN I DO?

Our segmental retaining wall systems provide an excellent solution to this problem. They are strong and will last a lifetime. Nicolock offers several different wall systems to meet your needs.

## WHAT IS GEOGRID AND WHEN SHOULD IT BE USED?

As a rule of thumb, all walls over 3' high should be reinforced with geogrid. Geogrid is placed between the layers of block at different intervals to stabilize the soil behind the retaining wall and secure the wall face to the earth behind it. The height of the finished wall, soil characteristics, and the pressure on the wall caused by slopes, structures, and/or paved areas all affect the proper placement and lengths of geogrid.

## WHAT IS RECONSTITUTED STONE?

Reconstituted Stone – is manufactured from the highest grade materials and will last for years. It is hand crafted, with molds taken from original natural stone for an authentic appearance. Nicostone products are a consistent thickness and are therefore easy to lay.

Colors – shades are subtle and subject to slight variations, especially highlighted in the weathered shades where many products are hand made to ensure a completely random, natural look. Colors will appear different depending upon the prevailing conditions such as sunlight, heavy shade or rain.

Therefore it is advisable to check the color and appearance of the actual product samples in dry daylight conditions before purchasing. Where possible, products should also be selected from the same production batch. Reconstituted stone will weather over time in a fashion similar to natural stone.

## PAVING SLAB AND WALLSTONE COLOR

Please note that some products have a multi-color mix where the manufacturing process means that different color percentages are likely selected from multiple pallets prior to installation. Choose from three to five different packs.

Multi-colored products are produced randomly, therefore color proportions in different slabs may vary widely.

## APPLICATION/SUITABILITY

Unless otherwise stated, the Nicostone materials featured in this catalog are intended for use in residential landscape projects. Nicostone decorative slabs are not suitable for driveways. The manufacturer cannot accept any liability where products have been used for any inappropriate purpose.

In the unlikely event of products reaching you in a less than satisfactory condition, please contact your local distributor directly, allowing time for the rejected product to be replaced. If a complaint is raised after laying the product, Nicostone cannot accept responsibility for any defect.

**De-icing salts should not be used on Nicostone slabs.**

## SIZES & JOINT WIDTHS

All dimensions quoted in this catalog are nominal and are for guidance only. Actual sizes will vary, particularly on the products designed to replicate natural stone which have features such as riven profiles and fettled edges. Where space is critical, Nicostone recommends dry laying the product to check area required.

When laying random slabs and circles, and in particular Old Town Flagstone Paving Slabs with their fettled edges, joint widths will depend on the slab type & laying pattern chosen and will be variable – from approximately 1/2" to 1".

## HANDLING

Standard manual handling techniques should be adopted when handling products. Some products in the Nicostone range are heavy or an awkward shape to lift and it is recommended that suitable lifting equipment be used for these products. Always wear gloves and safety footwear when handling product.

If product is to be cut, always wear safety goggles and when using a high speed saw also wear suitable respiratory protection, such as a dust mask.

Before removing wrapping or banding, ensure that the products are on level ground or retained in some way to prevent them from tipping over. When removing, shrink wrapping and banding use the appropriate cutting tools; also it is recommended that safety goggles are worn.

Product should always be handled with care as breakages, chipping and other damage may result from mishandling. Minor scuffing can occur due to movement in transit and will generally disappear in time. If in doubt do not install the product, consult your Nicolock Territory Manager.

## SPECIAL NOTES

All measurements are nominal. Dimensions include the joint widths when fully installed. Dimensions/height: May vary up to 1/4" due to unique manufacturing technique. Nicostone provides only general installation guidelines, climate and soil conditions may vary by region.

# PATTERNS

Patterns, whether simple or complex, help to define a paved area and add your own personality to your project. The following are examples of popular patterns.

## RUNNING BOND

Products that can be used:

- Plank Paver
- Ridge Brick
- Rustico 6x6
- Rustico 6x9
- Holland Stone
- Colonial Cobble 1.5 Normal
- Heritage Slab
- Old Vienna with paver-shield™
- The Montauk
- Euro Cobble
- Eco-Ridge
- SF-Rima

## RANDOM 3-PIECE RECTANGULAR & STAGGERED RUNNING BOND

Products that can be used:

- Stone Ridge
- Stone Ridge Contemporary
- Alpine Ridge
- Alpine Contemporary
- Blue Ridge
- Eco-Tre
- Natural Cleft Flagstone (Individual Sizes)
- Thermal Finish Flagstone (Individual Sizes)

## HERRINGBONE

Products that can be used:

- Plank Paver
- Ridge Brick
- Rustico 6x9
- Holland Stone
- Colonial Cobble 1.5 Normal
- Old Vienna with paver-shield™
- Eco-Ridge

## RANDOM 3-PIECE SQUARE & DIAGONAL PATTERN

Products that can be used:

- Stone Ridge XL

## BASKET WEAVE

Products that can be used:

- Plank Paver
- Ridge Brick
- Holland Stone
- Old Vienna with paver-shield™
- Eco-Ridge

## RANDOM 6-PIECE PATIO PACK

Products that can be used:

- Natural Cleft Flagstone Patio Pack
- Thermal Finish Flagstone Patio Pack
- Old Town Flagstone Patio Pack

## RANDOM 4-PIECE

Products that can be used:

- Rustico 4 Pc Combo

## FRENCH ASHLER PATTERN

Products that can be used:

- Versailles Travertine

## MODIFIED HERRINGBONE & 'I' PATTERN

Products that can be used:

- Rustico 6x6 & 6x9

**Please use patterns as a reference to get you started. The diagrams shown may require additional material if followed directly.**
