# Premier™ 6 Retaining Wall Blocks

**ROCKWOOD®**  
RETAINING WALLS  
*A better way.™*

Premier 6's revolutionary block design makes it the most efficient .75 sq. ft. SRW block ever. At just 44 lbs., it beats all other block systems for freight efficiencies and ease of construction.

**Features and specifications:**

- Easy to handle for increased efficiencies in the field
- No cumbersome/expensive pins or clips
- Capable of tight radius turns
- Incredible freight efficiencies

*The 4x2" anchor bar on the underside of the Premier 6 creates an automatic 0.5" (4.7°) setback.  
Manufactured in accordance with ASTM C1372*

Block	Size	Face Area	Weight	Units/Layer	Layers	Units/Pallet	Pallet Weight

Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or freestanding walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
