HEARTWOOD FIRE PIT KIT

FEATURES

The Heartwood Fire Pit Kit is a rustic showstopper—crafted with twelve long-format pieces from our signature Rosetta® Heartwood line.

Designed to mimic hand-hewn timber with rich textures and dimensional detail, each block brings the warmth of natural woodgrain with the durability of wetcast concrete.

Base Material Note: When installing the Heartwood Fire pit, fill the interior base with sand or small stone up to just above the steel insert.

This provides a stable base, helps dissipate heat, and minimizes the chance of cracking or shifting during use.

Do not leave the area beneath the steel insert hollow. Insufficient base fill can lead to excess heat transfer, uneven support, or damage to the block structure over time.

Steel Insert Weight:
130 lbs

Block Weight:
171 lbs

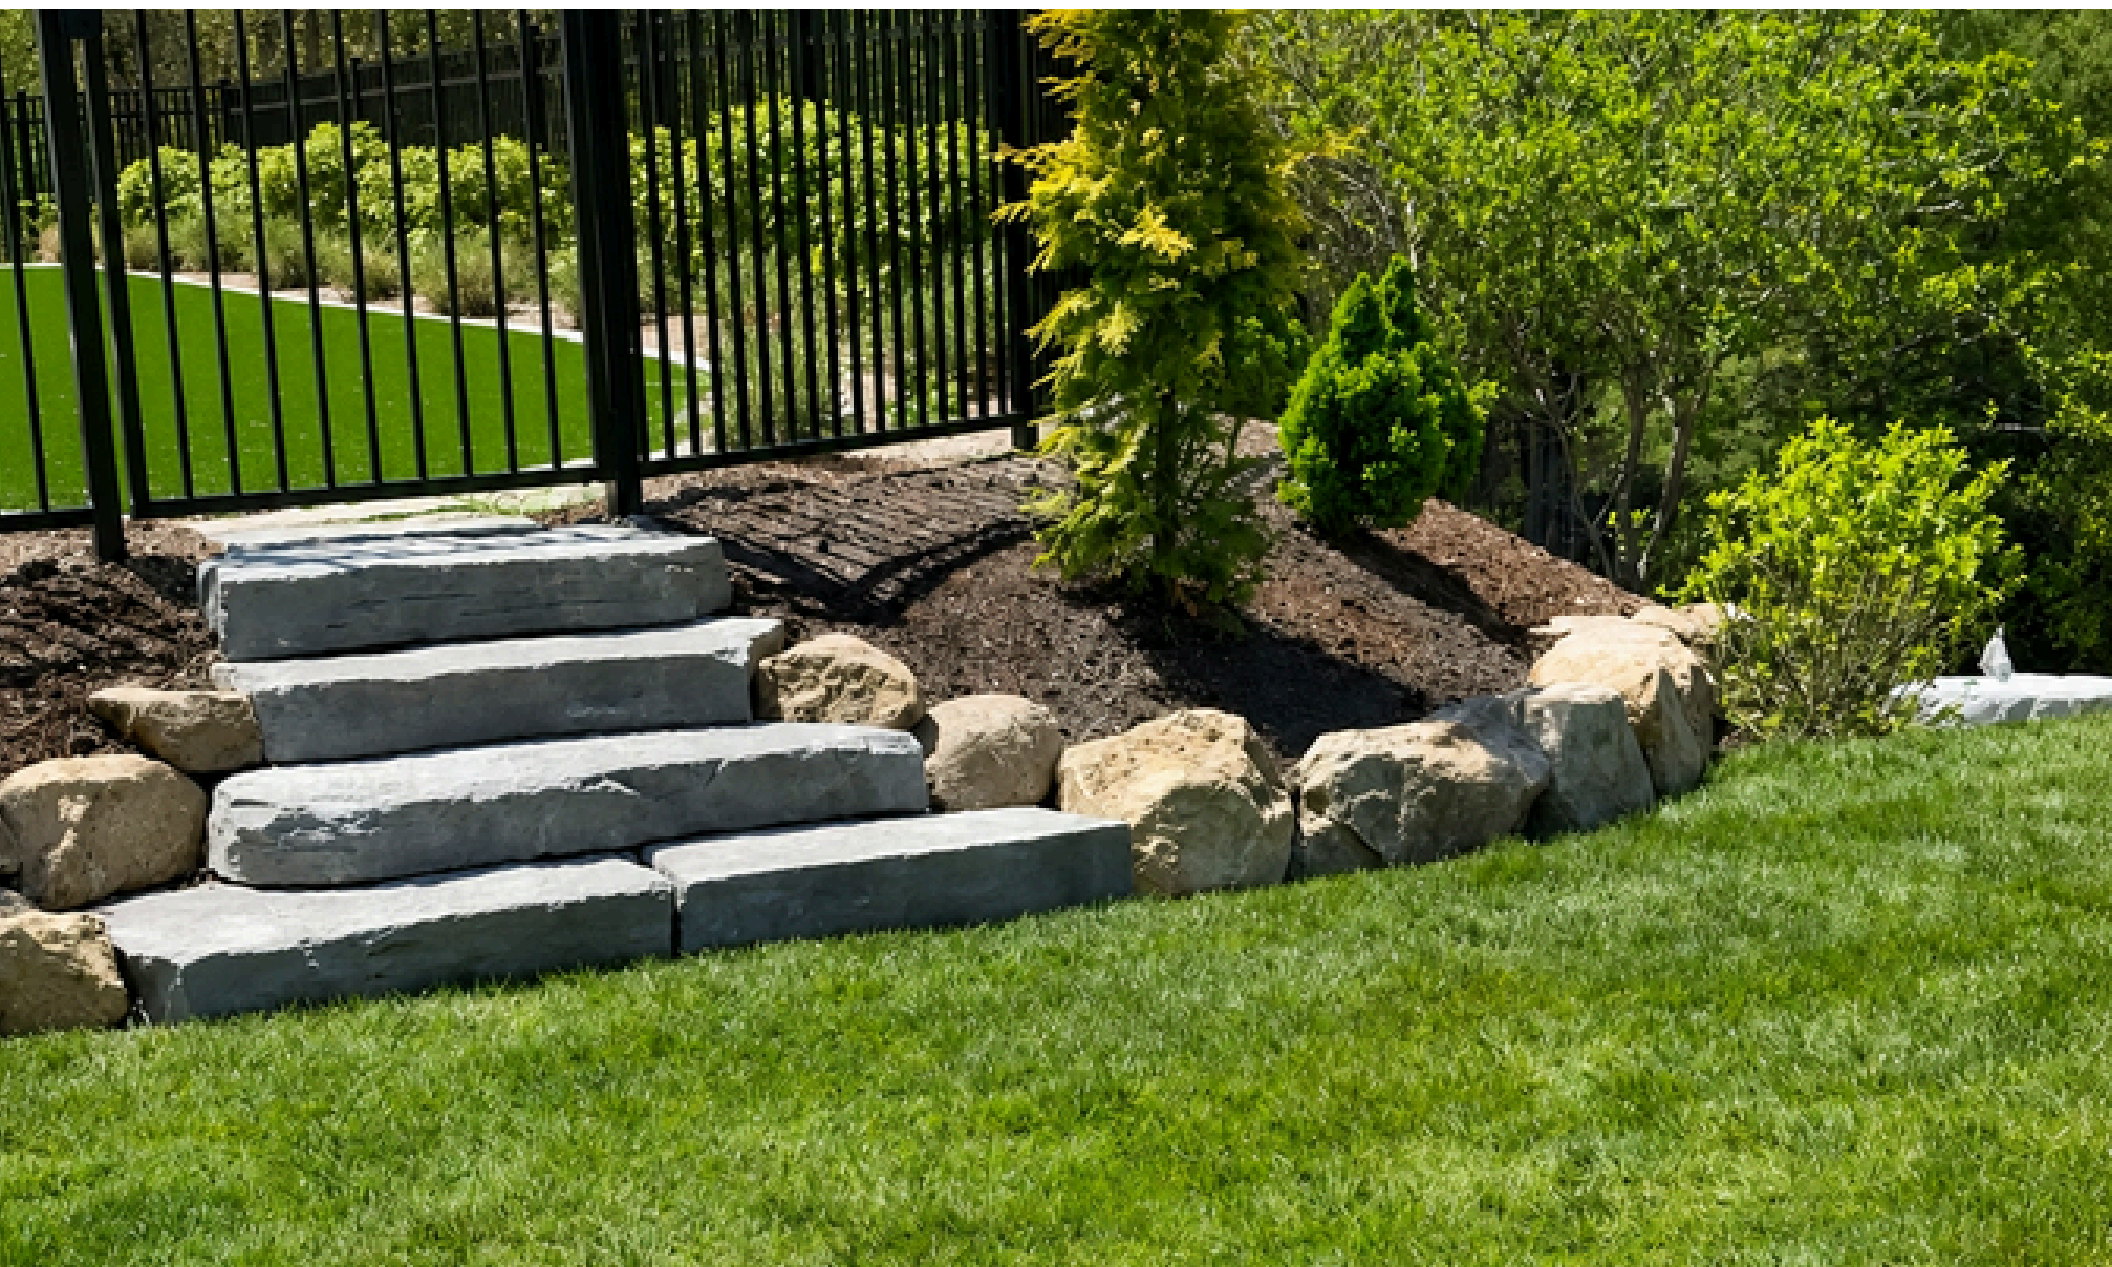

Pit Dimensions:

- Inside: 42" x 42" x 18"
- Outside: 50" x 50" x 18"

Block Dimensions:
8"(D) x 6"(H) x 42"(L)

Total Kit Weight (includes pallet): 2232 lbs
